What has made Roblox unique in its field has been the interplay between its enormous constellation of experiences and its personalised avatar system. When you enter any given Roblox world, the user does not assume control of a context-relevant character (think Sonic, Mario, or Lara Croft) but as your persistent, user-created avatar. A virtual You, effectively – whoever you've chosen to be. Add to that an attendant in-game economy which has sprung up to support this expression of identity, with all sorts of user-generated clothing, hairstyles, accessories and skins available to purchase in the platform's avatar shop. Roblox offers an opportunity, then, not just for play, but for digital-first designers and entrepreneurial retailers.

Therefore, you're taking a huge risk with your device's security by downloading them, as they could contain anything from viruses to spyware. They're also pretty unreliable. If you go to the trouble of downloading one, it might not even work.

You're here because you're playing Roblox and you found some games you want to play, in-game bonuses, items, VIP servers, and other cool stuff only obtained through the in-game currency, Robux. If you're curious about the cover art, this is still currently available via Reddit and Imgur. This artwork doesn't confirm much, other than the World War 2 setting. It's also very clear from these images that there will be, as expected, several editions of the game, including cross-gen bundles.

Some people refer to what we're building as the Metaverse," David Baszucki, CEO of gaming company the Roblox Corporation, told the crowd that had assembled virtually to hear the company's pitch to investors in February of this year. "We're shepherds of the Metaverse." When Roblox went public a month later, it quickly found itself valued at \$45 billion. That's more than gaming giant EA, as well as the might of Ubisoft, Take Two and Square-Enix combined. Clearly, there's a significant amount of faith in Roblox's promises. But can Roblox actually build a Metaverse?

That 73 percent is much higher than the 30 percent cut taken by Apple and Google's app stores (in most cases) and the 12 percent cut Epic Games takes from games on the Epic Games Store, though admittedly those stores aren't generally hosting an entire multiplayer game on your behalf. The company will also take a smaller cut if you spend your proceeds within the Roblox ecosystem, such as on ads.

Richard Bartle – a senior lecturer in computer game design at the University of Essex, where in 1978 he created the Multi-User Dungeon, a text-based game credited with being the first-ever virtual world – is unconvinced that experiencing media and meeting other avatars inside game worlds can be interpreted as the inception of a Metaverse. “Yes, you can [do those things]. But why would you?” he says, matter-of-factly. “In pandemic times, it's easy to say that: ‘You can go online and watch movies with your mates!’ But why would I need to go online, when I can just watch it on my television, which is much bigger – and doesn't have little [avatars] anywhere?”
